

Private Remote Sensing System License Public Summary

On September 6, 1994, the National Environmental Satellite, Data and Information Service of the National Oceanic and Atmospheric Administration, an agency of the U.S. Department of Commerce, issued or otherwise granted a License (the "License") to:

DigitalGlobe, Inc.
1601 Dry Creek Dr.
Suite 260
Longmont, CO 80503
Telephone # 303-684-4048
Website: www.digitalglobe.com

to operate a private, commercial, space-based, remote sensing system named QuickBird.

QuickBird 1, a low-earth orbit electro-optical imaging satellite system, which was designed to collect 0.8 meter resolution panchromatic and 3.2 meter multispectral imagery at between 450 and 600 kilometer altitudes with between 66 and 98 degree orbital locations, was launched from the Plesetsk cosmodrome in Russia. However, QuickBird 1 failed to reach orbit.
